JOURNAL OF STATISTICAL PHYSICS – Volume 19, 1978

The *Journal of Statistical Physics* accepts papers in the fields of statistical mechanics and thermodynamics of equilibrium and nonequilibrium processes. Papers on plasma physics, biology, stochastic processes, fluid dynamics, and chemical physics are also accepted provided they are of general interest in relating macroscopic behavior to microscopic interactions.

The general criteria for contributions are as follows. Papers should present important new results, and review papers should provide new insights. Clarity of presentation is important in all cases but, in many cases, particularly for review papers, it is the decisive criterion for publication. Each paper should be written in such a way that a clear understanding of the problem and of the results can be obtained from the abstract and introduction. Given that a paper meets these criteria, shorter papers are greatly preferred to longer ones. In summary, the journal publishes papers with important new results written clearly and concisely.

The journal also accepts communications in the following departments: news of meetings, questions and answers, book reviews, and letters to the editor.

CO-EDITORS

Joel L. Lebowitz, Department of Mathematics, Rutgers University, New Brunswick, New Jersey

Howard Reiss, Department of Chemistry, University of California, Los Angeles, California

EDITORIAL BOARD

J. A. Barker, IBM Research Laboratory, San Jose, California
Rodney Baxter, The Australian National University, Canberra, Australia
Bruce Berne, Columbia University, New York, New York
E. Brezin, CEN Saclay, Gif-sur-Yvette, France
D. Chandler, University of Illinois, Urbana, Illinois
E. G. D. Cohen, Rockefeller University, New York, New York
P. G. de Gennes, College de France, Paris, France
K. F. Freed, University of Chicago, Chicago, Illinois
Giovanni Gallavotti, University of Rome, Rome, Italy
Eric Heller, University of California, Los Angeles, California
P. C. Hemmer, Trondheim University, Trondheim, Norway
L. Kadanoff, Brown University, Providence, Rhode Island
R. Kubo, University of Tokyo, Tokyo, Japan
Elliott H. Lieb, Princeton University, Princeton, New Jersey
P. C. Martin, Harvard University, Cambridge, Massachusetts
Oliver Penrose, The Open University, Milton Keynes, England
Jerome Percus, New York University, New York, New York
Pierre Résibois, University of Brussels, Brussels, Belgium
L. K. Runnels, Louisiana State University, Baton Rouge, Louisiana
K. Shuler, University of California, La Jolla, California
Ya. Sinai, Landau Institute for Theoretical Physics, Moscow, USSR
George Stell, State University of New York, Stony Brook, New York
F. H. Stillinger, Jr., Bell Telephone Laboratories, Murray Hill, New Jersey
John C. Wheeler, University of California, La Jolla, California

BOOK REVIEW EDITOR

E. G. D. Cohen, Rockefeller University, New York, New York

Journal of Statistical Physics is published monthly by Plenum Publishing Corporation, 227 West 17th Street, New York, N.Y. 10011. Subscription orders should be addressed to the publisher. *Journal of Statistical Physics* is abstracted or indexed in Applied Mechanics Reviews, Current Contents, Engineering Index, Nuclear Science Abstracts, Referativnyi Zhurnal, Science Research Abstracts, and Solid State Abstracts Journal.

© 1978 Plenum Publishing Corporation. *Journal of Statistical Physics* participates in the program of Copyright Clearance Center, Inc. The appearance of a code line at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use. However, this consent is given on the condition that the copier pay the stated per-copy fee through the Copyright Clearance Center, Inc. for all copying not explicitly permitted by Sections 107 or 108 of the U.S. Copyright Law. It does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale, nor to the reprinting of figures, tables, and text excerpts.

Subscription rates:

Volumes 18 and 19, 1978 (6 issues each) $90.00 per volume. Outside the U.S. add $2.70 per volume for handling and mailing. Prices somewhat higher outside the U.S.

Volumes 20 and 21, 1979 (6 issues each) $112.50 per volume (outside the U.S., $127.00 per volume).

Second-class postage paid at New York, N.Y., and at additional mailing offices.

Printed in USA.

CONTENTS

Vol. 19, No. 1 July 1978

ARTICLES

Statistical Mechanics of a Nonlinear Stochastic Model 1
Rashmi C. Desai and Robert Zwanzig

Quantitative Universality for a Class of Nonlinear Transformations 25
Mitchell J. Feigenbaum

Spanning Lengths of Percolation Clusters 53
Ralph J. Harrison, George H. Bishop, Jr., and George D. Quinn

Stochastic Theory of Nonlinear Rate Processes with Multiple Stationary States. II. Relaxation Time from a Metastable State 65
K. Matsuo, K. Lindenberg, and K. E. Shuler

Essential Singularity in Percolation Problems and Asymptotic Behavior of Cluster Size Distribution 77
Hervé Kunz and Bernard Souillard

Future Contributions to *Journal of Statistical Physics* 107

Announcement 108

Vol. 19, No. 2 August 1978

ARTICLES

A Unified Approach for Deriving Kinetic Equations in Nonequilibrium Statistical Mechanics. II. Approximate Results 109
J. L. del Rio and L. S. García-Colín

Multiple Trapping of Random Walkers on Periodic Lattices 129
Alberto Robledo and Luis Woodhouse

The Statistics of Curie–Weiss Models 149
Richard S. Ellis and Charles M. Newman

Collective Modes and Dynamic Structure Factor of a Two-Dimensional Electron Fluid 163
Marc Baus

Delta-Function Expansion of Mayer Function with Application to Virial Coefficients 177
James C. Rainwater

Exact Analytical Formulas for the Distribution Functions of Charged Hard Spheres in the Mean Spherical Approximation 191
Douglas Henderson and William R. Smith

Addendum to Henderson and Smith's Exact Formulas for the Pair Correlation Functions of Charged Hard Spheres in the Mean Spherical Approximation 201
L. Blum

Future Contributions to *Journal of Statistical Physics* 203

Vol. 19, No. 3 September 1978

ARTICLES

The Yang–Lee Edge Singularity in Spherical Models 205
Douglas A. Kurtze and Michael E. Fisher

Percolation and Cluster Distribution. II. Layers, Variable-Range Interactions, and Exciton Cluster Model 219
J. Hoshen, R. Kopelman, and E. M. Monberg

Growth of Clusters in a First-Order Phase Transition 243
O. Penrose, Joel L. Lebowitz, J. Marro, M. H. Kalos, and A. Sur

Critical Exponents and Large-Order Behavior of Perturbation Theory 269
E. Brézin and G. Parisi

Statistical Mechanics of a Dynamical System Based on Conway's Game of Life 293
L. S. Schulman and P. E. Seiden

Future Contributions to *Journal of Statistical Physics* 315

Vol. 19, No. 4 October 1978

ARTICLES

Solution of the Ornstein–Zernike Equation with Yukawa Closure for a Mixture 317
L. Blum and J. S. Høye

Langevin Equation with Multi-Poissonian Noise 325
Akira Onuki

Generalized Master Equations Under Delocalized Initial Conditions 333
V. M. Kenkre

Long-Time Correlation Effects on Displacement Distributions 341
B. J. Alder and W. E. Alley

Susceptibility of the Rectangular Ising Ferromagnet 349
D. B. Abraham

Continuity of the Temperature and Derivation of the Gibbs Canonical Distribution in Classical Statistical Mechanics 359
R. Rechtman and O. Penrose

Scaling Properties of Models of Nonequilibrium Phenomena 367
S. W. Lovesey

The Theory of Melting in Heteropolymers. I. Random Chains 391
A. Vilenkin

The Theory of Melting in Heteropolymers. II. Correlated Chains 405
I. Simon and A. Vilenkin

Decimation Transformations in Lattice Systems of Continuous Spins 417
Gerald L. Jones

Future Contributions to *Journal of Statistical Physics* 427

Vol. 19, No. 5 November 1978

ARTICLES

Estimates of General Mayer Graphs. II. Long-Range Behavior of Graphs with Two Root Points Occurring in the Theory of Ionized Systems 429
Michel Lavaud

Correlation Inequalities for Non-Purely-Ferromagnetic Systems 453
Domokos Szàsz

Variational Approximations for Square Lattice Models in Statistical Mechanics 461
R. J. Baxter

Nonlinear Transport and Dynamics of Fluctuations 479
Hermann Grabert

Velocity of a Perturbation in Infinite Lattice Systems 499
C. Marchioro, A. Pellegrinotti, M. Pulvirenti, and L. Triolo

Open Quantum Systems with Time-Dependent Hamiltonians and Their Linear Response 511
E. B. Davies and H. Spohn

Analytic Results for Asymmetric Random Walk with Exponential Transition Probabilities 525
Dina Gutkowicz-Krusin, Itamar Procaccia, and John Ross

Cascade Model of Fully Developed Turbulence 543
Robert M. Kerr and Eric D. Siggia

Block Spins in the Edge of an Ising Ferromagnetic Half-Plane 553
D. B. Abraham

DEPARTMENT

Book Review: *Statistical Mechanics and Statistical Methods in Theory and Application* 557
N. G. van Kampen

Future Contributions to *Journal of Statistical Physics* 559

Vol. 19, No. 6 December 1978

ARTICLES

Structure of Interfaces from Uniformity of the Chemical Potential 563
B. Widom

Thermodynamical Proof of the Gibbs Formula for Elementary Quantum Systems 575
A. Lenard

Connection Between Dissipative and Resonant Conservative Nonlinear Oscillators 587
John McLaughlin

H-Theorem for the (Modified) Nonlinear Enskog Equation 593
P. Resibois

High-Density Percolation: Exact Solution on a Bethe Lattice 611
G. R. Reich and P. L. Leath

Exact Results for the Potts Model in Two Dimensions 623
A. Hintermann, H. Kunz, and F. Y. Wu

Transport Properties of the Lorentz Gas: Fourier's Law 633
Joel L. Lebowitz and Herbert Spohn

Future Contributions to *Journal of Statistical Physics* 655

Program of the 40th Statistical Mechanics Meeting 657

Author Index to Volume 19 663

Subject Index to Volume 19 665
